

Over the past 10 years we have sold many hundreds of the Plug In Pest Free units. Our customers have been very pleased with the product and the feedback we have had has been excellent.

Our customers have been our best advertisement in talking to other people about this product and how well it works, especially through the recent mouse plague we have had.

It is also great to see an Australian made electrical product with local back up sales and support and very prompt delivery of stock.

We would have no hesitation in recommending this product to our customers and to all other Retravision stores.
